PROFESSIONAL SUMMARY

Computer Engineering student and Physics minor at Aydin Adnan Menderes University. Focused on solving engineering challenges through physical and mathematical foundations, with a background in embedded systems and software development. Experienced in organizational leadership as General Secretary for IEEE ADU.

EDUCATION

- **Aydin Adnan Menderes University** Aydin, Turkey
B.S. in Computer Engineering (GPA: 3.1) *Sep 2023 – Jun 2028 (Expected)*
 - Physics Minor Program (Commenced Sep 2025).

EXPERIENCE

- **InfoCube IT Consulting** Remote
Volunteer Intern *Jun 2025 – Sep 2025*
 - System and Network Management: Configured corporate network hierarchies and deployed core IT infrastructure.
 - Hardware Integration: Integrated servers and endpoint devices into network frameworks.
 - Operational Optimization: Supported IT infrastructure management and technical problem-solving.
- **IEEE ADU Student Branch** Aydin, Turkey
General Secretary *Jun 2025 – Present*
 - Project Coordination: Managed planning and budgeting for UNIDES, 3rd Aydin Technology Summit, and IEEE Aegean Region Meeting.
 - Strategic Management: Handled official correspondence and board meeting organization.
- **Astralles Rocketry Team** Aydin, Turkey
Embedded Systems Developer *Aug 2024 – Mar 2025*
 - Telemetry Design: Developed low-power telemetry architectures for high-altitude rockets.
 - Sensor Fusion: Implemented I2C and SPI protocols for high-precision flight data acquisition.
 - System Validation: Conducted integration and field tests to ensure firmware compatibility with mechanical systems.

SKILLS

Languages: Java, C, C++, Python, JavaScript, HTML/CSS
Embedded & Hardware: ESP32, Arduino, IoT Applications, Sensor Integration, Telemetry, I2C/SPI
Tools & Technologies: Git, GitHub, React, Linux Basics, System & Network Configuration
Management: Project Management (UNIDES), Team Leadership, Event Coordination
Languages: Turkish (Native), English (B2)

PROJECTS

- **PrizmaVita** | *React, JavaScript, HTML/CSS*
 - Modern UI/UX portfolio and blog platform developed with component-based architecture.
- **ESP32 Digital Multimeter** | *Embedded C++*
 - Portable measurement device utilizing ADC units for high-precision voltage and current data acquisition.
- **Smart Misting System** | *Arduino, IoT*
 - Autonomous climate control system utilizing sensors for automatic humidity optimization.
